4.4. Activity diagram use case mengelola **Movie**

4.5. Activity diagram use case mengelola katalog **Product**

4.6. Activity diagram use case jadwalkan ShowTime

5. Asumsi

1. Payment gateway masih dalam bentuk stub, terletak pada application / module terpisah, misalnya `/stub/payment-gateway/`. Sediakan endpoint pada sistem sebagai callback untuk dipanggil stub payment gateway untuk memperbarui status **Payment** menjadi **PAID** atau **EXPIRED**. Pada stub payment gateway, buat endpoint untuk mengisukan pembayaran baru, dan berikan interface dummy untuk membayar suatu pembayaran dari sisi payment gateway.
